SIX MONTHS IN KANSAS. BIA MONTHS IN KANSAS.

BY A RIGHLY CULTIVATED LADY OF SOSTON.

She went to Kansas last beptember, and was there during all the earlier struggles of the pioneer settlers, and describes in the most graphic manner the perils which surrounded them, and the sufferings which they endured. She gives also a most glowing picture of the country, its climate, surface, soil, productions, &c.

Biernatski, the author of this work, was the grandson of an exiled Polish nobleman. He died in the zeith of his fame, leaving "The Hailig" as his chef d'ouvre. In Germany it is very popular, and has run through several editions. It is remarkable for brilliant descriptions of nature and natural phenomena, for profound discussions of momentous themes, and especially in its pictures of the hailig, for revelations of an entirely new phase of human life. A poetic spirit pervades it might well pass for an original English work.

THE ADVENTURES OF GERARD THE LION-KILLER.

"Gerard stood sentinel on the mountain side from sunset till daylight, listening for the jockais' bark that heralded the coming of the master, or carefully following him by his tracks under the light of the full moon to the half-finished banque the had left on the previous night. Truly a royal game for the hunter to play, and a pleasant tale for the reader who loves the chase as the roblest of all pastimes. Jules Gerard has spent 600 nights in the open air, watching for his noble prey, and has a sin with his own hand upward of a score of flous. LOW RATES and INTEREST.

Those Lands were granted by the Generatement to add in the construction of this Railread, and include some of the richest and most fertile Prairies in the State, interspersed here and there with magnificent groves of oak nine and other timber. The Road extends from Chicago on the north-eart to Caire at the north, and from thesee to Gales at the court, and from thesee to Gales at the south, and from these to Gales at the south eart affected by it for transporting the products of the lands to any of those points, and from thesee to Eastern and Southern markets. Moreover, the rapid growth of fourishing towns and rilages long the line, and the great increase in population by immigration, &c., afford a substantial and growing boome demands for farm produce.

is mind that issued there of any value, along the water-courses and for many miles inland, have been disposed of that for those located in the interior there are seen disposed of that for those located in the interior there are seen disposed of that for those located in the interior there are seen disposed for the service of the land of the transporting the produce to market, relieved not having been introduced there; that to send the produce of these lands one or two handred miles by wagou to market would cost much more than the argence of cultivating them, and hence Government lands thus fituated, at \$1.20 per core, are not se good investments as the land of this Company at the prices fixed.

The same remarks hold good to relation to the lands in Kanses and Nebracks, for although vacant lands may be found seased the water courses, the distance to market is for greater, and every hundred miles the produce of these lands is carried either in wagons, or interrupted water communications, increases the appears of transportation, which must be borne by the settlers, in the reduced prices of their products and to that attent processing are the incomes from their farms, and of sourmy on their invostments, annually and every year reduced.

The great fertility of the lands now offered for sale by this Company, and their consequent yield over those of the Eastern and Middle Sistee, is much more than sufficient to pay the difference in the cost of transportation, especially in view of the facilities formished by this Road, and others with which it connects, the operations of which are not interrupted by the low water of Summer or the frost of Water.
